Abstract

**Data center** managers can design computer rooms without moving a single piece of equipment by using a special software package. The software, called The Graphic **Data Center** Manager from the Graphic Management Group in Valhalla, N.Y., enables you to make any desired changes in the **layout** of your **data center** on a PC screen. Besides speeding computer room **layout** changes this capability expedites solutions to computer room maintenance problems. For example, if **cooling** or airconditioning equipment requires adjustment, it is a simple matter to call up a drawing of the appropriate system on the PC screen and pinpoint the location of the unit that may need attention. (0 refs).

Fast detection of communication patterns in distributed executions

Thomas Kunz, Michiel F. H. Seuren

November 1997 Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research

Full text available: pdf(4.21 MB)

Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

Will Moore's Law Be Sufficient?

Erik P. DeBenedictis

November 2004 Proceedings of the 2004 ACM/IEEE conference on Supercomputing

Full text available: pdf(518.77 KB) Additional Information: full citation, abstract

It seems well understood that supercomputer simulation is an enabler for scientific discoveries, weapons, and other activities of value to society. It also seems widely believed that Mooreýs Law will make progressively more powerful supercomputers over time and thus enable more of these contributions. This paper seeks to add detail to these arguments, revealing them to be generally correct but not a smooth and effortless progression. This paper will review some key problems that can be solved wi ...

5 Part 1: perspectives on reversible computing: Reversible logic for supercomputing Erik P. DeBenedictis

May 2005 Proceedings of the 2nd conference on Computing frontiers

Full text available: pdf(401.79 KB) Additional Information: full citation, abstract, references, index terms

This paper is about making reversible logic a reality for supercomputing. Reversible logic offers a way to exceed certain basic limits on the performance of computers, yet a powerful case will have to be made to justify its substantial development expense. This paper explores the limits of current, irreversible logic for supercomputers, thus forming a threshold above which reversible logic is the only solution. Problems above this threshold are discussed, with the science and mitigation of globa ...

6 Routers with a single stage of buffering

Sundar Iyer, Rui Zhang, Nick McKeown

Full text available: pdf(253.61 KB) Additional Information: full citation, abstract, references, index terms

Most high performance routers today use combined input and output queueing (CIOQ). The CIOQ router is also frequently used as an abstract model for routers: at one extreme is input queueing, at the other extreme is output queueing, and in-between there is a continuum of performance as the speedup is increased from 1 to N (where N is the number of linecards). The model includes architectures in which a switch fabric is sandwiched between two stages of buffering. There is a rich and ...

A general framework for visualizing abstract objects and relations Tomihisa Kamada, Satoru Kawai

January 1991 ACM Transactions on Graphics (TOG), Volume 10 Issue 1

Full text available: pdf(2.26 MB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u> terms

Pictorial representations significantly enhance our ability to understand complicated relations and structures, which means that information systems strongly require user interfaces that support the visualization of many kinds of information with a wide variety of graphical forms. At present, however, these difficult visualization problems have not been solved. We present a visualization framework for translating abstract objects and relations, typically represented in textual forms, into p ...

8 VLSI cell placement techniques

K. Shahookar, P. Mazumder

June 1991 ACM Computing Surveys (CSUR), Volume 23 Issue 2

Full text available: pdf(5.28 MB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u> <u>terms</u>, <u>review</u>

VLSI cell placement problem is known to be NP complete. A wide repertoire of heuristic

algorithms exists in the literature for efficiently arranging the logic cells on a VLSI chip. The objective of this paper is to present a comprehensive survey of the various cell placement techniques, with emphasis on standard cell and macro placement. Five major algorithms for placement are discussed: simulated annealing, force-directed placement, min-cut placement, placement by numerical optimization, a ...

**Keywords:** VLSI, floor planning, force-directed placement, gate array, genetic algorithm, integrated circuits, layout, min-cut, physical design, placement, simulated annealing, standard cell

Type-based hot swapping of running modules (extended abstract)
Dominic Duggan

October 2001 ACM SIGPLAN Notices, Proceedings of the sixth ACM SIGPLAN international conference on Functional programming, Volume 36 Issue 10

Full text available: pdf(150.34 KB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u> <u>terms</u>

While dynamic linking has become an integral part of the run-time execution of modem programming languages, there is increasing recognition of the need for support for hot swapping of running modules, particularly in long-lived server applications. The interesting challenge for such a facility is to allow the new module to change the types exported by the original module, while preserving type safety. This paper describes a type-based approach to hot swapping running modules. The approach is bas ...

**Keywords**: dynamic typing, hot swapping, module interconnection languages, shared libraries

10 Sensor networks and communication systems: Energy optimization techniques in cluster interconnects

E. J. Kim, K. H. Yum, G. M. Link, N. Vijaykrishnan, M. Kandemir, M. J. Irwin, M. Yousif, C. R. Das

August 2003 Proceedings of the 2003 international symposium on Low power electronics and design

Full text available: pdf(286.75 KB) Additional Information: full citation, abstract, references, index terms

Designing energy-efficient clusters has recently become an important concern to make these systems economically attractive for many applications. Since the links and switch buffers consume the major portion of the power budget of the cluster, the focus of this paper is to optimize the energy consumption in these two components. To minimize power in the links, we propose a novel dynamic link shutdown (DLS) technique. The DLS technique makes use of an appropriate adaptive routing algorithm to shut ...

**Keywords:** buffer design, cluster interconnect, dynamic link shutdown, dynamic voltage scaling, energy optimization, link design, switch design

11 Illustrative risks to the public in the use of computer systems and related technology Peter G. Neumann

January 1992 ACM SIGSOFT Software Engineering Notes, Volume 17 Issue 1

Full text available: pdf(1.65 MB) Additional Information: full citation, citings, index terms

12

The A to Z of SoCs

Reinaldo A. Bergamaschi, John Cohn

#### November 2002 Proceedings of the 2002 IEEE/ACM international conference on Computer-aided design

Full text available: ndf(209.48 KB)

Additional Information: full citation, abstract, references, citings, index

The exploding complexity of new chips and the ever decreasing time-to-market window are forcing fundamental changes in the way systems are designed. The advent of Systems-on-Chip (SoC) based on pre-designed intellectual-property (IP) cores has become an absolute necessity for embedded systems companies to remain competitive. Designing an SoC, however, is extremely complex, as it encompasses a range of difficult problems in hardware and software design. This paper explains a wide range of SoC iss ...

### 13 User interface directions for the Web

## 16 GraphicsNet '95: integrated voice, video, graphics and data network using asynchronous transfer made (ATM)

Marke Clinger

February 1996 ACM SIGGRAPH Computer Graphics, Volume 30 Issue 1

Full text available: pdf(1.15 MB)

Additional Information: full citation, abstract, index terms

Every year demonstrations at the SIGGRAPH conference push the envelope in state-of-theart graphics. In 1995, SIGGRAPH also pushed the envelope in networking by deploying a conference-wide, production ATM network. GraphicsNet, the conference network, consisted of 400 Ethernet-over-ATM connections and 100 directly attached ATM devices. GraphicsNet was one of the largest ATM backbone networks deployed to date. Using the latest hardware and software available, GraphicsNet provided a switched intern ...

19 A Hybrid Architectural Style for Distributed Parallel Processing of Generic Data Streams

Alexandre R. J. Francois

May 2004 Proceedings of the 26th International Conference on Software Engineering

Full text available: pdf(250.47 KB) Additional Information: full citation, abstract

Immersive, interactive applications grouped under the concept of Immersipresence require on-line processing andmixing of multimedia data streams and structures. One criticalissue seldom addressed is the integration of differentsolutions to technical challenges, developed independentlyin separate fields, into working systems, that operateunder hard performance constraints. In order to realizethe Immersipresence vision, a consistent, generic approachto system integration is needed, that is adapted ...

20 Layout driven re-synthesis for low power consumption LSIs. Masako Murofushi, Takashi Ishioka, Masami Murakata, Takashi Mitsuhashi June 1997 Proceedings of the 34th annual conference on Design automation - Volume

Publisher Site

Full text available: pdf(183.99 KB) Additional Information: full citation, abstract, references, citings, index terms

A new technology re-mapping method named LDR (LayoutDriven Re-synthesis), which is applied after placement, is proposed.LDR executes re-mapping and re-placement simultaneouslyin order to minimize power consumption with placementinformation. High switching activity nets are concealed insidethe re-mapped cells or are shortened by replacement in LDR.To estimate power consumption, LDR uses static power estimatorfor combinational circuits.LDR also calculates wirecapacitances accurately based on place ...

3.	Catastrophic wind damage to North American forests and the potential impact of climate change • ARTICLE  The Science of The Total Environment, Volume 262, Issue 3, 15 November 2000,  Pages 287-311  Chris J. Peterson  Abstract
4.	Hybrid nuclear reactors • REVIEW ARTICLE  Progress in Particle and Nuclear Physics, Volume 43, 1999, Pages 683-827  H. Nifenecker, S. David, J. M. Loiseaux and A. Giorni  Abstract
5.	An alternative synthesis of peptidyl α-keto-2-oxazolines • ARTICLE Bioorganic & Medicinal Chemistry Letters, Volume 8, Issue 10, 19 May 1998, Pages 1273-1276  Derek Dunn and Sankar Chatterjee Abstract   Abstract + References   PDF (196 K)
6.	Synthesis, characterization and x-ray crystal structures of asymmetric bis

	(dialkyldithiocarbamates) of zinc: Potential precursors for ZnS deposition	• ARTICLE
*****	Polyhedron, Volume 15, Issue 16, August 1996, Pages 2801-2808	
	Mahid Motevalli, Paul O'Brien, John R. Walsh and Ian M. Watson	
	Abstract   Abstract + References   PDF (575 K)	
	Mahid Motevalli, Paul O'Brien, John R. Walsh and Ian M. Watson	

7. The advanced neutron source: Designing for science • ARTICLE
Progress in Nuclear Energy, Volume 30, Issue 1, 1996, Pages 67-118
R. A. Brown, R. M. Harrington, J. B. Hayter, T. J. McManamy, D. L. Moses, F. J. Peretz,
C. C. Queen, H. B. Shapira, P. B. Thompson and C. D. West
Abstract

1.	Airflow distribution through perforated tiles in raised-floor data centers • ARTICLE Building and Environment, In Press, Corrected Proof, Available online 31 May 2005, Kailash C. Karki and Suhas V. Patankar Abstract
2. 🎑	INTEGRAL: In flight behavior of ISGRI and SPI • ARTICLE  Nuclear Instruments and Methods in Physics Research Section A: Accelerators,  Spectrometers, Detectors and Associated Equipment, Volume 541, Issues 1-2, 1 April 2005,  Pages 323-331  F. Lebrun, JP. Roques, A. Sauvageon, R. Terrier, P. Laurent, O. Limousin, F. Lugiez and  A. Claret  SummaryPlus   Full Text + Links   PDF (362 K)
3.	Optimization algorithms and natural computing in drug discovery • REVIEW ARTICLE Drug Discovery Today: Technologies, Volume 1, Issue 3, December 2004, Pages 247-252 Tom Solmajer and Jure Zupan Abstract
4. 🖺	Building automation security in office buildings • ARTICLE  Computer Fraud & Security, Volume 2004, Issue 10, October 2004, Pages 4-6  Eve Edelson  Abstract
5.	An improved pneumatic sample transport system for measurement of activation cross-sections with d-D neutrons in the energy range between 2.1 and 3.1 MeV • ARTICLE Nuclear Instruments and Methods in Physics Research Section A: Accelerators, Spectrometers, Detectors and Associated Equipment, Volume 527, Issue 3, 21 July 2004, Pages 543-553  T. Shimizu, H. Sakane, S. Furuichi, M. Shibata, K. Kawade and H. Takeuchi SummaryPlus   Full Text + Links   PDF (344 K)
6. 🖺	Integrating satellite remote sensing techniques for detection and analysis of uncontrolled coal seam fires in North China • ARTICLE

- 2, 15 January 1991, Pages 312-320 J. R. Morales and L. O. FigueroaP. MartensJ. L. Romero **Abstract**
- Crustal structure and tectonic evolution european of the transition between the Baltic 23. Shield and the North German Caledonides (the EUGENO-S Project) • ARTICLE Tectonophysics, Volume 150, Issue 3, 1 August 1988, Pages 253-348 **EUGENO-S Working Group Abstract**
